This conference offers a unique forum for exchanging ideas and discussing recent developments in the field of competition law globally. It brings together leading figures in the field from both sides of the Atlantic including members of the judiciary, competition enforcement bodies, academia, in-house counsel and private practice. The conference combines the policy perspective of the London-based Interdisciplinary Centre for Competition Law and Policy (ICC) with the real world experience of the international law firm of Crowell & Moring LLP.

This will be a one-day event, with four major areas of focus: **international merger control**; **international cartel procedures**; **private enforcement, damages claims and recovery**; and **abuse of dominance**. Our aim on this occasion is to take into account the particular perspectives of the business community and explain how important recent developments in competition law affect everyday policies and practices adopted by businesses. All of these topics will be illustrated by practical examples drawn from recent cases taken from the EU, US and other competition law regimes.
